CAR VIBRODAMPING

CTK SpeakerKit Vibrodamping kit

Material: CTK SpeakerKit eliminates resonance and vibration of metal elements of the car door and plastic sheathing.

By gluing the CTK material to the area around the speaker, you will eliminate vibration and rattling and improve the sound quality. Your audio system will play much better, the sound in the middle and low frequencies will be significantly improved.

CTK SpeakerKit is designed for 4 speakers. self-adhesive material, recommended when installing, use the CTK Roller.
